

PROFUNDS®

Summary Prospectus

NOVEMBER 27, 2024

Bitcoin ProFund

CLASS	TICKER	CUSIP
Investor	BTCFX	74318X653

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated November 27, 2024, and Statement of Additional Information, dated November 27, 2024, and as each hereafter may be supplemented or amended, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at ProFunds.com/ProFundsinfo; by calling 888-PRO-3637 (888-776-3637) (financial professionals should call 888-PRO-5717 (888-776-5717)); or by sending an e-mail request to info@ProFunds.com. The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

Investment Objective

Bitcoin ProFund (the “Fund”) seeks investment results, before fees and expenses, that correspond to the performance of bitcoin. The Fund currently seeks to achieve this objective primarily through investments in bitcoin futures contracts. **The Fund does not invest directly in bitcoin.**

Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

Shareholder Fees

(fees paid directly from your investment)

Wire Fee \$10

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Investor Class
Investment Advisory Fees	0.45%
Other Expenses ^{1,2}	<u>0.86%</u>
Total Annual Fund Operating Expenses Before Fee Waivers and Expense Reimbursements	1.31%
Fee Waivers/Reimbursements ³	<u>-0.15%</u>
Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements	<u>1.16%</u>

1 “Other Expenses” includes 0.06% of Interest Expense incurred in the course of implementing the Fund’s strategy.

2 The information in the table has been restated to reflect current fees and expenses.

3 ProFund Advisors LLC (“ProFund Advisors”) has contractually agreed to waive fees and to reimburse expenses, excluding Interest and FCM Expense, to the extent necessary to limit such fees and expenses to 1.10% through November 30, 2025. Amounts waived or reimbursed in a particular contractual period may be recouped by ProFund Advisors within three years subject to certain limitations.

Example: This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same, except that the fee waiver/expense reimbursement is assumed only to pertain to the first year. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor Class	\$118	\$400	\$704	\$1,566

The Fund pays transaction and financing costs associated with the purchase and sale of securities and derivatives. These costs are not reflected in the table or the example above.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. During the most recent fiscal year, the Fund’s annual portfolio turnover rate was 0% of the average value of its portfolio. The portfolio turnover rate is calculated without regard to cash instruments or derivatives transactions. If such transactions were included, the Fund’s portfolio turnover rate would be significantly higher.

Principal Investment Strategies

The Fund seeks to achieve its investment objective primarily through managed exposure to bitcoin futures contracts. In this manner, the Fund seeks to provide investment results that correspond to the performance of bitcoin.

The Fund does not invest directly in bitcoin. Investors seeking a direct investment in bitcoin should consider an investment other than the Fund.

Bitcoin is a digital asset. The ownership and operation of bitcoin is determined by participants in an online, peer-to-peer network sometimes referred to as the “Bitcoin Network”. The Bitcoin Network connects computers that run publicly accessible, or “open source,” software that follows the rules and procedures governing the Bitcoin Network. This is commonly referred to as the Bitcoin Protocol (and is described in more detail in the section entitled “The Bitcoin Protocol” in the Fund’s Prospectus). Bitcoin may be used to pay for goods and services, stored for future use, or converted to a government-issued currency. As of the date of this Prospectus, the adoption of bitcoin for these purposes has been limited and bitcoin presently is not widely accepted as a means of payment.

The value of bitcoin is not backed by any government, corporation, or other identified body. Instead, its value is determined in part by the supply and demand in markets created to facilitate trading of bitcoin. Ownership and transaction records for bitcoin are protected through public-key cryptography. The supply of bitcoin is determined by the Bitcoin Protocol. No single entity owns or operates the Bitcoin Network. The Bitcoin Network is collectively maintained by (1) a decentralized group of participants who run computer software that results in the recording and validation of transactions (commonly referred to as “miners”), (2) developers who propose improvements to the Bitcoin Protocol and the software that enforces the protocol and (3) users who choose which version of the bitcoin software to run. From time to time, the developers suggest changes to the bitcoin software. If a sufficient

number of users and miners elect not to adopt the changes, a new digital asset, operating on the earlier version of the bitcoin software, may be created. This is often referred to as a “fork.” The value of the Fund may reflect the impact of these forks.

The Fund will invest principally in the financial instruments listed below.

- **Derivatives** — Financial instruments whose value is derived from the value of an underlying asset or rate, such as bitcoin. These derivatives principally include:
 - **Bitcoin Futures Contracts** — Standardized, cash-settled bitcoin futures contracts traded on commodity exchanges registered with the Commodity Futures Trading Commission (“CFTC”). The Fund seeks to invest in cash-settled, front-month bitcoin futures.
- **Canadian Exchange Traded Funds** — In limited circumstances, for example to manage inflows and outflows or respond to unusual market conditions or increases in margin requirements, the Fund may invest in the securities of exchange traded funds, or “ETFs”, organized and listed for trading in Canada. The shares of these ETFs represent an interest in a portfolio of bitcoin.
- **Money Market Instruments** — The Fund expects that any cash balances maintained in connection with its use of derivatives will typically be held in high quality, short-term money market instruments, for example:
 - **U.S. Treasury Bills** — U.S. government securities that have initial maturities of one year or less, and are supported by the full faith and credit of the U.S. government.
 - **Repurchase Agreements** — Contracts in which a seller of securities, usually U.S. government securities or other money market instruments, agrees to buy the securities back at a specified time and price.
- **Reverse Repurchase Agreements** — The Fund seeks to engage in reverse repurchase agreements, a form of borrowing or leverage, and uses the proceeds to help achieve the Fund’s investment objective.

In order to maintain its exposure to bitcoin futures contracts, the Fund must sell its futures contracts as they near expiration and replace them with new futures contracts with a later expiration date. This is often referred to as “rolling” a futures contract. Futures contracts with a longer term to expiration may be priced higher than futures contracts with a shorter term to expiration, a relationship called “contango.” When rolling futures contracts that are in contango, the Fund will sell the expiring contract at a relatively lower price and buy a longer-dated contract at a relatively higher price.

Conversely, futures contracts with a longer term to expiration may be priced lower than futures contracts with a shorter term to expiration, a relationship called “backwardation.” When

rolling futures contracts that are in backwardation, the Fund will sell the expiring contract at a relatively higher price and buy a longer-dated contract at a relatively lower price.

The Fund expects to gain exposure by investing a portion of its assets in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands and advised by ProFund Advisors. Because the Fund intends to qualify for treatment as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended, the Fund intends to invest no more than 25% of the Fund’s total assets in the subsidiary at each quarter end of the Fund’s tax year. Exceeding this amount may have tax consequences, see the section entitled “Tax Risk” in the Fund’s Prospectus for more information. References to investments by the Fund should be read to mean investments by either the Fund or the subsidiary.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

Principal Risks

You could lose money by investing in the Fund.

- **Investment Strategy Risk** — The Fund seeks to provide investment results that correspond to the performance of bitcoin by primarily investing in bitcoin futures contracts. **The Fund does not invest directly in or hold bitcoin.** Investors seeking a direct investment in bitcoin should consider an investment other than the Fund. While the performance of bitcoin futures contracts, in general, has historically been highly correlated to the performance of “spot” bitcoin, there can be no guarantee that this will continue. “Spot” bitcoin refers to bitcoin that can be purchased immediately. The performance of the Fund should not be expected to match the performance of spot bitcoin.
- **Bitcoin Market Volatility Risk** — The prices of bitcoin and bitcoin futures have historically been highly volatile. The value of the Fund’s investments in bitcoin futures — and therefore the value of an investment in the Fund — could decline significantly and without warning, including to zero. If you are not prepared to accept significant and unexpected changes in the value of the Fund and the possibility that you could lose your entire investment in the Fund you should not invest in the Fund.

Trading prices of bitcoin and other digital assets have experienced significant volatility in recent periods and may continue to do so. For instance, there were steep increases in the value of certain digital assets, including bitcoin over the course of 2021, and multiple market observers asserted that digital assets were experiencing a “bubble.” These increases were followed by steep drawdowns throughout 2022 in digital asset trading prices, including for bitcoin. These episodes of rapid price appreciation followed by steep drawdowns have occurred multiple times throughout bitcoin’s history, including in 2011, 2013-2014, and 2017-2018, before

repeating again in 2021-2022. In 2023 and over the course of 2024, bitcoin prices have continued to exhibit extreme volatility. Such volatility is expected to persist.

- **Liquidity Risk** — The market for the bitcoin futures contracts is still developing and may be subject to periods of illiquidity. During such times it may be difficult or impossible to buy or sell a position at the desired price. Market disruptions or volatility can also make it difficult to find a counterparty willing to transact at a reasonable price and sufficient size. Illiquid markets may cause losses, which could be significant. The large size of the positions which the Fund may acquire increases the risk of illiquidity, may make its positions more difficult to liquidate, and may increase the losses incurred while trying to do so. Such large positions also may impact the price of bitcoin futures, which could decrease the correlation between the performance of bitcoin futures and spot bitcoin.
- **Bitcoin Futures Risk** – The market for bitcoin futures may be less developed, and potentially less liquid and more volatile, than more established futures markets. While the bitcoin futures market has grown substantially since bitcoin futures commenced trading, there can be no assurance that this growth will continue. The price for bitcoin futures contracts is based on a number of factors, including the supply of and the demand for bitcoin futures contracts. Market conditions and expectations, regulatory limitations or limitations imposed by the listing exchanges or futures commission merchants (“FCMs”) (e.g., margin requirements, position limits, and accountability levels), collateral requirements, availability of counterparties, and other factors each can impact the supply of and demand for bitcoin futures contracts.

Market conditions and expectations, margin requirements, position limits, accountability levels, collateral requirements, availability of counterparties, and other factors may also limit the Fund’s ability to achieve its desired exposure to bitcoin futures contracts. If the Fund is unable to achieve such exposure it may not be able to meet its investment objective and the Fund’s returns may be different or lower than expected. Additionally, collateral requirements may require the Fund to liquidate its positions, potentially incurring losses and expenses, when it otherwise would not do so. Investing in derivatives like bitcoin futures may be considered aggressive and may expose the Fund to significant risks. These risks include counterparty risk and liquidity risk.

The performance of bitcoin futures contracts, in general, has historically been highly correlated to the performance of bitcoin. However, there can be no guarantee this will continue. Transaction costs (including the costs associated with futures investing), position limits, the availability of counterparties and other factors may impact the cost of bitcoin futures contracts and decrease the correlation between the performance of bitcoin futures contracts and bitcoin, over short or even long-term periods. In the event that there are

persistent disconnects between bitcoin and bitcoin futures, the Fund may not be able to obtain the desired exposure and may not be able to achieve its investment objective.

Moreover, price differences between bitcoin and bitcoin futures will expose the Fund to risks different from, and possibly greater than, the risks associated with investing directly in bitcoin, including larger losses or smaller gains.

- **Bitcoin Futures Capacity Risk** – If the Fund’s ability to obtain exposure to bitcoin futures contracts consistent with its investment objective is disrupted for any reason including, for example, limited liquidity in the bitcoin futures market, or a disruption to the bitcoin futures market, as a result of margin requirements, position limit, accountability levels, or other limitations imposed by the Fund’s futures commission merchants (“FCMs”), the listing exchanges or the CFTC, the Fund may not be able to achieve its investment objective and may experience significant losses.

In such circumstances, the Advisor intends to take such actions as it believes appropriate and in the best interest of the Fund. Any disruption in the Fund’s ability to obtain exposure to bitcoin futures contracts will cause the Fund’s performance to deviate from the performance of bitcoin and bitcoin futures. Additionally, the ability of the Fund to obtain exposure to bitcoin futures contracts is limited by certain tax rules that limit the amount the Fund can invest in its wholly-owned subsidiary as of the end of each tax quarter. Exceeding this amount may have tax consequences, see the section entitled “Tax Risk” in the Fund’s Prospectus for more information.

- **Cost of Futures Investment Risk** – As discussed above, when a bitcoin futures contract is nearing expiration, the Fund will “roll” the futures contract, which means it will generally sell such contract and use the proceeds to buy a bitcoin futures contract with a later expiration date. When rolling futures contracts that are in contango, the Fund would sell a lower priced, expiring contract and purchase a higher priced, longer-dated contract. The price difference between the expiring contract and longer-dated contract associated with rolling bitcoin futures is typically substantially higher than the price difference associated with rolling other futures contracts. Bitcoin futures have historically experienced extended periods of contango. Contango in the bitcoin futures market may have a significant adverse impact on the performance of the Fund and may cause bitcoin futures and the Fund to underperform spot bitcoin. Both contango and backwardation would reduce the Fund’s correlation to spot bitcoin and may limit or prevent the Fund from achieving its investment objective.
- **Bitcoin Risk** – The Fund’s investments in bitcoin futures contracts expose the Fund to the risks associated with an investment in bitcoin because the price of bitcoin futures is substantially based on the price of bitcoin. Bitcoin is a

relatively new innovation and is subject to unique and substantial risks. The market for bitcoin is subject to rapid price swings, changes and uncertainty.

The further development of the Bitcoin Network and the acceptance and use of bitcoin are subject to a variety of factors that are difficult to evaluate. The slowing, stopping or reversing of the development of the Bitcoin Network or the acceptance of bitcoin may adversely affect the price and liquidity of bitcoin. The widespread adoption of a competing digital asset or blockchain may result in a reduction in demand for bitcoin. A significant portion of the demand for bitcoin may be the result of speculation. Such speculation regarding the potential future appreciation in the price of bitcoin may artificially inflate or deflate the price of bitcoin and increase volatility. Bitcoin is subject to the risk of fraud, theft, manipulation or security failures, operational or other problems that impact digital asset trading venues. Additionally, if one or a coordinated group of miners were to gain control of 51% of the Bitcoin Network, they would have the ability to execute extensive attacks, manipulate transactions, halt payments and fraudulently obtain bitcoin. A significant portion of bitcoin is held by a small number of holders sometimes referred to as “whales”. Transactions by these holders may influence the price of bitcoin.

Unlike the exchanges for more traditional assets, such as equity securities and futures contracts, bitcoin and digital asset trading venues are largely unregulated, may be operating out of compliance with regulation, and are highly fragmented. As a result of the lack of regulation, individuals or groups may engage in fraud or market manipulation (including using social media to promote bitcoin in a way that artificially increases the price of bitcoin). Investors may be more exposed to the risk of theft, fraud and market manipulation than when investing in more traditional asset classes. Over the past several years, a number of digital asset trading venues have been closed due to fraud, failure or security breaches. Investors in bitcoin may have little or no recourse should such theft, fraud or manipulation occur and could suffer significant losses. Legal or regulatory changes may negatively impact the operation of the Bitcoin Network or restrict the use of bitcoin. In addition, digital asset trading venues, bitcoin miners, and other participants may have significant exposure to other digital assets. Instability in the price, availability or legal or regulatory status of those instruments may adversely impact the operation of the digital asset trading venues and the Bitcoin Network. As a result, events that are not necessarily related to the security or utility of bitcoin can nonetheless cause a significant decline in the price of bitcoin (e.g., the collapse of TerraUSD in May 2022 and FTX Trading Ltd. in November 2022).

The realization of any of these risks could result in a decline in the acceptance of bitcoin and consequently a reduction in the value of bitcoin, bitcoin futures, and the Fund. Finally, the creation of a “fork” (as described above) or a substantial

giveaway of bitcoin (sometimes referred to as an “air drop”) may result in significant and unexpected declines in the value of bitcoin, bitcoin futures, and the Fund.

- **Canadian ETF Risk** – Canadian ETFs that provide exposure to bitcoin are subject to many of the same risks as a direct investment in bitcoin. Additionally, shares of these ETFs may trade at a premium or discount from the value of their underlying investments, may become illiquid, may or may not be correlated with the price of bitcoin or bitcoin futures contracts, and may be highly volatile. If the Fund invests in an ETF, the Fund’s shareholders will indirectly bear the Fund’s proportionate share of the fees and expenses paid by that ETF, in addition to the Fund’s own fees and expenses. In addition, Canadian ETFs are not regulated under the 1940 Act, the Securities Act of 1933, as amended, or any other U.S. federal or state securities laws. Therefore, the Fund’s investments in these vehicles will not benefit from the protections and restrictions of such laws.
- **Subsidiary Investment Risk** — Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the subsidiary are organized, respectively, could result in the inability of the Fund to operate as intended and could negatively affect the Fund and its shareholders.
- **Borrowing Risk** – The Fund may borrow for investment purposes using reverse repurchase agreements. In particular, the Fund may enter into reverse repurchase agreements at or near its tax quarter-end. The cost of borrowing may reduce the Fund’s return during those periods. Borrowing may cause the Fund to liquidate positions under adverse market conditions to satisfy its repayment obligations. Borrowing increases the risk of loss and may increase the volatility of the Fund. There can be no assurance that the Fund will be able to enter into reverse repurchase agreements or obtain favorable terms for those agreements.
- **Money Market Instruments Risk** — Adverse economic, political or market events affecting issuers of money market instruments, defaults by counterparties or changes in government regulations may have a negative impact on the performance of the Fund.
- **Counterparty Risk** — The Fund may lose money if a counterparty does not meet its contractual obligations.
- **Concentration Risk** — The Fund has a significant portion of its value in bitcoin futures. As a result, the Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries.
- **Non-Diversification Risk** — The Fund has the ability to invest a relatively high percentage of its assets in the securities of a small number of issuers or in financial instruments with a single counterparty or a few counterparties. This may increase the Fund’s volatility and increase the risk that the Fund’s performance will decline based on the performance of a single issuer or the credit of a single counterparty.

- **Active Management Risk** — The Fund is actively managed and its performance reflects the investment decisions that ProFund Advisors makes for the Fund. ProFund Advisors’ judgments about the Fund’s investments may prove to be incorrect. If the investments selected and strategies employed by the Fund fail to produce the intended results, the Fund could underperform or have negative returns as compared to other funds with a similar investment objective and/or strategies.
- **Active Investor Risk** —The Fund permits short-term trading of its securities. This may have a negative impact on the Fund’s ability to achieve its investment objective or maintain a consistent level of operating expenses. In certain circumstances, the Fund’s expense ratio may vary from current estimates or the historical ratio disclosed in this Prospectus. In addition, this will increase portfolio turnover and may result in additional costs for the Fund.
- **Early Close/Late Close/Trading Halt Risk** — An exchange or market may close early, close late or issue trading halts on bitcoin futures contracts. In these circumstances, each Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

Investment Results

The bar chart below shows how the Fund’s investment results for Investor Class shares during its first full calendar year of operations, and the table shows how the Fund’s average annual total returns for various periods compare with a broad measure of market performance. This information provides some indication of the risks of investing in the Fund. In addition, the Fund’s performance information reflects applicable fee waivers and/or expenses limitations, if any, in effect during the periods presented. Absent such fee waivers/expense limitations, if any, performance would have been lower. Past results (before and after taxes) are not predictive of future results. Updated information on the Fund’s results can be obtained by visiting the Fund’s website (www.profunds.com).

Annual Returns as of December 31

Best Quarter (ended 3/31/2023): 70.31%
 Worst Quarter (ended 6/30/2022): -59.30%
 Year-to-Date (ended 9/30/2024): 40.62%

Average Annual Total Returns

As of December 31, 2023

	One Year	Since Inception	Inception Date
Investor Class Shares			7/28/2021
– Before Taxes	133.39%	-3.40%	
– After Taxes on Distributions	120.31%	-5.66%	
– After Taxes on Distributions and Sale of Shares	76.78%	-3.71%	
Bloomberg Bitcoin Index^{1,2}	153.85%	57.95%	
Bloomberg Galaxy Bitcoin Index¹	153.01%	1.84%	
S&P 500[®] Index³	26.29%	5.05%	

- 1 Reflects no deduction for fees, expenses or taxes. “Since Inception” returns are calculated from the date the Fund commenced operations, not the date of inception of the Index.
- 2 After the close of business on December 22, 2023, the Fund’s performance benchmark changed from the Bloomberg Galaxy Bitcoin Index to the Bloomberg Bitcoin Index in connection with a change to the Fund’s investment objective.
- 3 Reflects no deduction for fees, expenses or taxes. “Since Inception” returns are calculated from the date the Fund commenced operations, not the date of inception of the Index. Adjusted to reflect the reinvestment of dividends paid by issuers in the Index.

Management

The Fund is advised by ProFund Advisors. Alexander Ilyasov, Senior Portfolio Manager, and George Banian, Portfolio Manager, have jointly and primarily managed the Fund since July 2021 and March 2022, respectively.

Purchase and Sale of Fund Shares

The **minimum initial investment** amounts, which may be waived at the discretion of the Fund, are:

- \$1,000 for accounts that list a financial professional.
- \$1,000 for self-directed accounts.

You may purchase, redeem or exchange Fund shares on any day which the New York Stock Exchange is open for business. Depending on where your account is held, you may redeem your shares by contacting your financial professional or the Fund by mail, telephone, wire transfer or on-line (www.profunds.com).

Tax Information

The Fund's distributions generally are taxable, and will be taxed as ordinary income, qualified dividend income or capital gains,

unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. You may be taxed later upon withdrawal of monies from such tax-advantaged arrangements. The Fund intends to distribute income, if any, monthly, and capital gains, if any, at least annually.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a financial intermediary, such as a broker-dealer or investment adviser, the Fund and its distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary to recommend the Fund over another investment. Ask your financial intermediary or visit your financial intermediary's website for more information.
