Summary Prospectus Investor and Service Class

NOVEMBER 27, 2024

Large-Cap Value ProFund

CLASS	TICKER	CUSIP
Investor	LVPIX	74318A-513
Service	LVPSX	74318A-497

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated November 27, 2024, and Statement of Additional Information, dated November 27, 2024, and as each hereafter may be supplemented or amended, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at ProFunds.com/ProFundsinfo; by calling 888-PRO-3637 (888-776-3637) (financial professionals should call 888-PRO-5717 (888-776-5717)); or by sending an e-mail request to info@ProFunds.com. The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

Investment Objective

Large-Cap Value ProFund (the “Fund”) seeks investment results, before fees and expenses, that track the performance of the S&P 500[®] Value Index (the “Index”).

Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

Shareholder Fees

(fees paid directly from your investment)

Wire Fee \$10

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Investor Class	Service Class
Investment Advisory Fees	0.75%	0.75%
Distribution and Service (12b-1) Fees	0.00%	1.00%
Other Expenses ¹	<u>1.06%</u>	<u>1.06%</u>
Total Annual Fund Operating Expenses Before Fee Waivers and Expense Reimbursements²	1.81%	2.81%
Fee Waivers/Reimbursements	<u>-0.03%</u>	<u>-0.03%</u>
Total Annual Fund Operating Expenses After Fee Waivers and Expense Reimbursements	<u>1.78%</u>	<u>2.78%</u>

1 The information in the table has been restated to reflect current fees and expenses.

2 ProFund Advisors LLC (“ProFund Advisors”) has agreed to waive fees and to reimburse expenses to the extent Total Annual Fund Operating Expenses Before Fee Waivers and Expense Reimbursements, as a percentage of average daily net assets, exceed 1.78% for Investor Class shares and 2.78% for Service Class shares through November 30, 2025. This agreement may not be terminated before that date without the approval of the Fund’s Board. Amounts waived or reimbursed in a particular contractual period may be recouped by ProFund Advisors within three years subject to certain limitations.

Example: This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

	1Year	3Years	5Years	10Years
Investor Class	\$181	\$567	\$977	\$2,124
Service Class	\$281	\$868	\$1,481	\$3,136

The Fund pays transaction and financing costs associated with the purchase and sale of securities and derivatives. These costs are not reflected in the table or the example above.

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. During the most recent fiscal year, the Fund’s annual portfolio turnover rate was 762% of the average value of its portfolio. This portfolio turnover rate is calculated without regard to cash instruments or derivatives transactions. If such transactions were included, the Fund’s portfolio turnover rate would be significantly higher.

Principal Investment Strategies

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index.

The Index is designed to measure the performance of value stocks included in the S&P 500 Index. The S&P 500 Index is designed to measure the performance of the 500 largest companies listed and domiciled in the U.S. The Index includes the stocks in the S&P 500 Index with the strongest value characteristics based on: book value to price ratio, earnings to price ratio, and sales to price ratio. The selected stocks are then weighted based on market capitalization. The Index’s composition and assigned weights are reevaluated annually in December with additional weight adjustments in March, June and September. The Index is constructed and maintained by S&P Dow Jones Indices LLC. More information about the Index can be found using the Bloomberg ticker symbol “SVX.”

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Index or in instruments with similar economic characteristics.

The Fund will invest principally in the financial instruments listed below.

- **Equity Securities** — Common stock issued by public companies.
- **Derivatives** — Financial instruments whose value is derived from the value of an underlying asset or assets, such as stocks, bonds, ETFs, interest rates or indexes. The Fund invests in derivatives in order to gain exposure to the Index. These derivatives principally include:
 - **Swap Agreements** — Contracts entered into primarily with major global financial institutions for a specified period ranging from a day to more than one year. In a standard swap transaction, two parties agree to exchange or “swap” payments based on the change in value of an underlying asset or benchmark. For example, two parties

may agree to exchange the return (or differentials in rates of returns) earned or realized on a particular investment or instrument.

- **Futures Contracts** — Standardized contracts that obligate the parties to buy or sell an asset at a predetermined price and date in the future.
- **Money Market Instruments** — The Fund expects that any cash balances maintained in connection with its use of derivatives will typically be held in high quality, short-term money market instruments, for example:
 - **U.S. Treasury Bills** — U.S. government securities that have initial maturities of one year or less, and are supported by the full faith and credit of the U.S. government.
 - **Repurchase Agreements** — Contracts in which a seller of securities, usually U.S. government securities or other money market instruments, agrees to buy the securities back at a specified time and price.

ProFund Advisors uses a mathematical approach to investing in which it determines the type, quantity and mix of investment positions that it believes, in combination, the Fund should hold to produce returns consistent with its investment objective. The Fund seeks to remain fully invested at all times in financial instruments that, in combination, provide exposure consistent with the investment objective, without regard to market conditions, trends or direction. The Fund may also invest in or gain exposure to only a representative sample of the securities in the Index or to securities not contained in the Index or in financial instruments, with the intent of obtaining exposure consistent with the investment objective.

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

Principal Risks

You could lose money by investing in the Fund.

- **Derivatives Risk** — Investing in derivatives to obtain exposure may be considered aggressive and may expose the Fund to greater risks including counterparty risk and correlation risk. The Fund may lose money if its derivatives do not perform as expected and may even lose money if they do perform as expected. To the extent the Fund invests in swaps that use an ETF as the reference asset, the Fund will be subject to the risks of that ETF including the risk that the ETF may not meet its investment objective. In addition, the Fund may be subject to greater correlation risk since the performance of the ETF may not correlate to the performance of the Index. Any costs associated with using derivatives will reduce the Fund’s return.
- **Counterparty Risk** — The Fund may lose money if a counterparty does not meet its contractual obligations. With respect to swap agreements, if the Index has a dramatic intraday move that causes a material decline in the Fund’s net

assets, the terms of a swap agreement between the Fund and its counterparty may permit the counterparty to immediately close out the transaction with the Fund. In that event, the Fund may be unable to enter into another swap agreement or invest in other derivatives to achieve its investment objective.

- **Large-Cap Company Investment Risk** — Although returns on investments in large-cap companies are often perceived as being less volatile than the returns of companies with smaller market capitalizations, the return on large-cap securities could trail the returns on investments in smaller and mid-sized companies for a number of reasons. For example, large-cap companies may be unable to respond quickly to new competitive challenges, such as changes in technology, and also may not be able to attain the high growth rate of successful smaller companies.
- **Value Investing Risk** — Value investing carries the risk that the market will not recognize a security’s intrinsic value for a long time, or that a stock deemed to be undervalued by the relevant index methodology may actually be appropriately priced or overvalued.
- **Equity and Market Risk** — Equity markets are volatile, and the value of equity securities and other instruments correlated with equity markets may fluctuate dramatically from day to day. Equity markets are subject to corporate, political, regulatory, market and economic developments, as well as developments that impact specific economic sectors, industries or segments of the market.
- **Money Market Instruments Risk** — Adverse economic, political or market events affecting issuers of money market instruments, defaults by counterparties or changes in government regulations may have a negative impact on the performance of the Fund.
- **Correlation Risk** — A number of factors may affect the Fund’s ability to achieve a high degree of correlation with the Index. Fees, expenses, transaction costs, among other factors, will adversely impact the Fund’s ability to meet its investment objective. In addition, the Fund’s exposure may not be consistent with the Index. For example, the Fund may not have exposure to all of the securities in the Index, its weighting of securities may be different from that of the Index, and it may invest in instruments not included in the Index.
- **Industry Concentration Risk** — The Index may have a significant portion of its value in issuers in an industry or group of industries. The Fund will allocate its investments to approximately the same extent as the Index. As a result, the Fund may be subject to greater market fluctuations than a fund that is more broadly invested across industries. As of July 31, 2024, the Index had a significant portion of its value in issuers in the financials and health care industry groups.
 - **Financials Industry Risk** — Companies in this industry may experience: extensive governmental regulation

and/or nationalization that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain; adverse effects from increases in interest rates; adverse effects on profitability by loan losses; and severe competition.

- **Health Care Industry Risk** — Companies in this industry may experience: heavy dependence on patent protection; litigation and product liability expense; the long and costly process for obtaining new product approval by the Food and Drug Administration; and product obsolescence.
- **Index Performance Risk** — The Index used by the Fund may underperform other asset classes and may underperform other similar indices. The Index is maintained by a third party provider unaffiliated with the Fund or ProFund Advisors. There can be no guarantee that the methodology underlying the Index or the daily calculation of the Index will be free from error.
- **Active Investor Risk** — The Fund permits short-term trading of its securities. This may have a negative impact on the Fund's ability to achieve its investment objective or maintain a consistent level of operating expenses. In certain circumstances, the Fund's expense ratio may vary from current estimates or the historical ratio disclosed in this Prospectus. In addition, this will increase portfolio turnover and may result in additional costs for the Fund.
- **Early Close/Late Close/Trading Halt Risk** — An exchange or market may close early, close late or issue trading halts on specific securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Please see "Investment Objectives, Principal Investment Strategies and Related Risks" in the Fund's Prospectus for additional details.

Investment Results

The bar chart below shows how the Fund's investment results for Investor Class shares have varied from year to year, and the table shows how the Fund's average annual total returns for various periods compare with different broad measures of market performance. Performance for Service Class shares would differ to the extent their fees and expenses differ. This information provides some indication of the risks of investing in the Fund. In addition, the Fund's performance information reflects applicable fee waivers and/or expense limitations, if any, in effect during the periods presented. Absent such fee waivers/expense limitations, if any, performance would have been lower. Past results (before and after taxes) are not predictive of future

results. Updated information on the Fund's results can be obtained by visiting the Fund's website (www.profund.com).

Annual Returns as of December 31

Best Quarter (ended 12/31/2020): 13.93%
 Worst Quarter (ended 3/31/2020): -25.65%
 Year-to-Date (ended 9/30/2024): 13.51%

Average Annual Total Returns

As of December 31, 2023

	One Year	Five Years	Ten Years	Inception Date
Investor Class Shares				10/1/2002
– Before Taxes	19.78%	11.98%	8.03%	
– After Taxes on Distributions	19.78%	11.94%	7.74%	
– After Taxes on Distributions and Sale of Shares	11.71%	9.58%	6.44%	
Service Class Shares	18.56%	10.86%	6.94%	10/1/2002
S&P 500® Value Index¹	22.23%	14.11%	10.01%	
S&P 500® Index¹	26.29%	15.69%	12.03%	

¹ Reflects no deduction for fees, expenses or taxes. Adjusted to reflect the reinvestment of dividends paid by issuers in the Index.

Average annual total returns are shown on a before- and after-tax basis for the Fund. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold shares through tax-deferred arrangements, such as a retirement account. After-tax returns may exceed the return before taxes due to a tax benefit from realizing a capital loss on a sale of shares.

Management

The Fund is advised by ProFund Advisors. Michael Neches, Senior Portfolio Manager, and Devin Sullivan, Portfolio Manager,

have jointly and primarily managed the Fund since October 2013 and April 2018, respectively.

Purchase and Sale of Fund Shares

The **minimum initial investment** amounts for all classes, which may be waived at the discretion of the Fund, are:

- \$5,000 for accounts that list a financial professional.
- \$15,000 for self-directed accounts.

You may purchase, redeem or exchange Fund shares on any day which the New York Stock Exchange is open for business. Depending on where your account is held, you may redeem your shares by contacting your financial professional or the Fund by mail, telephone, wire transfer or on-line (www.profunds.com).

Tax Information

The Fund's distributions generally are taxable, and will be taxed as ordinary income, qualified dividend income or capital gains,

unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. You may be taxed later upon withdrawal of monies from such tax-advantaged arrangements. The Fund intends to distribute income, if any, and capital gains, if any, at least annually.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a financial intermediary, such as a broker-dealer or investment adviser, the Fund and its distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary to recommend the Fund over another investment. Ask your financial intermediary or visit your financial intermediary's website for more information.
