Investor Class	\$193	1.78%

How did the Fund perform last year?

Mid-Cap Growth ProFund (the "Fund") seeks investment results, before fees and expenses, that track the performance of the S&P MidCap 400[®] Growth Index (the "Index"). The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index. For the year ended July 31, 2024, the Fund had an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a total return of 19.31% and a volatility of 15.66%. The index performance was driven by the strong equity environment, though its returns lagged the S&P 500[®] in part due to absence of the "Magnificent Seven". Primary factors affecting Fund performance include the total return of the securities held by the Fund, expenses, transaction costs, the volatility of a Fund's index, and other miscellaneous factors.

Cumulative performance: August 1, 2014 through July 31, 2024

Total Return Based on \$10,000 Investment

The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past ten years (or since inception if shorter). Performance data quoted represents past performance and does not guarantee future results. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of fund shares.
