## How did the Fund perform last year?

**U.S. Government Plus ProFund** (the "Fund") seeks daily investment results, before fees and expenses, that correspond to one and one-quarter times (1.25x) of the daily performance of the most recently issued 30-Year U.S. Treasury Bond (the "Long Bond"). The Fund invests in financial instruments that ProFund Advisors believes, in combination, should produce daily returns consistent with the Fund's investment objective. For the year ended July 31, 2024, the Fund had an average daily statistical correlation of over 0.99 to one and one-quarter times the daily price movement of the Long Bond. For the same period, the Long Bond, as measured by the S&P U.S. Treasury Bond Current 30 Year Total Return Index, had a total return of -1.88% and a volatility of 16.24%. Long Bond returns were driven by elevated interest rates. Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which any derivatives are linked, financing rates paid or earned, expenses, transaction costs, the volatility of the Fund's Index, the impact of compounding, and other miscellaneous factors.
